AI Crypto Trading

One unique aspect of this international market is that there is no central marketplace for foreign exchange. Rather, currency trading is conducted electronically Crypto Mining which means that all transactions occur via computer networks among traders around the world, rather than on one centralized exchange. The market is open 24 hours a day, five and a half days a week, and currencies are traded worldwide in the major financial centres of Frankfurt, Hong Kong, London, New York, Paris, Singapore, Sydney, Tokyo, and Zurich - across almost every time zone. This means that when the U.S. trading day ends, the Crypto market begins anew in Tokyo and Hong Kong. As such, the Crypto market can be extremely active anytime, with price quotes changing constantly.
